01 PROFILE

Final-year product design student at MIT-WPU, Pune, working across industrial and automotive design. I'm hands-on and curious about how things work, and I'd rather test an idea with a rough prototype than leave it on paper. I enjoy talking to the people a product is meant for, and I'm comfortable leading a team or working with clients to get something built. Away from the workshop I'm an animal lover with four dogs at home, and I'm happiest on a long motorcycle ride or a trek.

I'm looking for a role in industrial or automotive design where I can take products from user research to a working prototype.

02 EXPERIENCE

Founder and lead fabricator
2025 – Present

Vahanik Customs, Pune

- Set up and run a home workshop for custom motorcycle builds, chassis repairs and servicing.
- Rebuilt a Honda CBR 250R end to end: bodywork, engine and gearing, ECU tuning, suspension and brakes.

Design intern
Summer 2025 · 61 days

Life Transformation Centre, MIT-WPU · Boribel, Daund

- One of 25 interns chosen to design, build and install 10 theme projects across a 170-acre campus, including a 35-ft landmark pylon and wayfinding gateways.
- Main point of contact between our team and the client.
- Welded road barricades in the workshop and supervised their installation on site.

Video editor
Feb – Mar 2025

Carma and Company

- Edited client videos and helped shape their visual branding.

Intern
May – Jul 2021

CRY (Child Rights and You)

- Ran fundraising and awareness campaigns for child-rights programmes.

03 RESEARCH

eSwitch Dual Drive
2026 · Ongoing

B.Des research project · CNG–electric hybrid retrofit for auto-rickshaws

- Drivers lose hours of earnings in CNG queues, and a full EV conversion means scrapping a working engine.
- Designing a bolt-on kit that adds an electric drive alongside the CNG engine: electric in city traffic, CNG for longer runs, switched from the dashboard. Packaging is being developed in Fusion 360, informed by field visits with drivers.

04 EDUCATION

2023 – 2027
B.Des, Product Design
MIT-WPU School of Design, Pune

2023
Class XII, PCB with Psychology
Army Public School, Sagar

2021
Class X
Delhi Public School, Sangrur

05 AWARDS

2026
Patent application in progress
Royal Enfield Bullet EV conversion

2024
Indian Army AWWA Award
Southern Command, for the electric go-kart

2022
4th place nationally
All India Science Exhibition, Amity University, for the Eco Jeep

06 CERTIFICATIONS

Beep Learning · 2026
Automobile Management
Electric Vehicle Management
Certified Two-Wheeler Service Technician

IFR · 2021
Basic Robotics
Advanced Robotics

IIT Delhi · 2019
AI and ML
Automobile Engineering
Introduction to Robotics

08 LANGUAGES

English, Hindi, Marathi

09 SKILLS

DESIGN

User research · Concept development · Prototyping · DFM · CMF · System design

SOFTWARE

Fusion 360 · Rhino · Photoshop · Illustrator · Premiere Pro · iMovie

WORKSHOP

Arc welding · Metal fabrication · EV conversion · BLDC setup · 3D printing

ELECTRONICS

Arduino · Basic coding · IR / ultrasonic / thermal sensors

10 LEADERSHIP

2025 – 26
University Vice President
MIT-WPU

2025 – 26
Coordination Lead
Design XPO 2026

2023 – Present
Class Representative
Product Design, MIT-WPU

2023
School Captain
Army Public School, Sagar

2019
Campus Ambassador
For APS Akhnoor at IIT Delhi

07 PROJECTS

Kshovik, ultrasonic utensil washer
2025 – 26 · Team of 5

A tabletop ultrasonic washer for whisks, graters and strainers, shaped after traditional Indian cooking pots. I led research, mock-ups, the working proof of concept and 3D modelling. Pitched to investors.

Smart Traffic Management System
2025 · Team of 3

An add-on for existing signals that counts vehicles with a thermal camera and adjusts green-light time to match, with an ambulance override. Built a working signal and junction model after 30 user interviews.

Air cooler redesign (Symphony Diet 35T)
2025 · Solo

Took the cooler apart, found 14 design issues and surveyed 30 owners. Water spillage topped the complaints (77%), so the redesign adds top filling, a visible water-level window and lockable wheels.

Electric go-kart
AWWA AWARD

2024

Welded a steel ladder frame around a 24 V brushed DC motor, chain drive and reused scooter tyres.

Electric waste-collection tricycle
2023

Converted a sanitation worker's pedal tricycle to 24 V electric drive, so heavy loads no longer depend on leg power.

Royal Enfield Bullet 350, EV conversion
2022 – 23

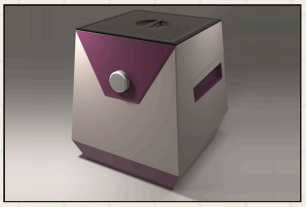

PATENT APPLICATION IN PROGRESS

Swapped the engine for a 48 V high-torque BLDC motor on a custom geared mount, keeping the original gearbox and chain drive. The battery sits in the old engine bay. Range: 95+ km on a 4–5 hour charge.

Eco Jeep
NATIONAL 4TH · AMITY UNIVERSITY

2019 – 21

A two-seat pedal-electric quadricycle with a steel-tube frame, reused bicycle parts, Ackermann steering and about 25 km of electric range.

01 KSHOVIK

02 TRAFFIC MANAGEMENT

03 AIR COOLER

04 GO-KART

05 BULLET EV

06 ECO JEEP
